To insert a standard text to the text widget, we can use the insertion(insert, "text, to insert") or insert ("1.0", "text to insert") After the text widget statement. ExampleIn This example, we will insert the text into the text box beginning. # Import the required libraries from Tkinter Import # create an instance from Tkinter Frame Win = tk () #el the geometry of the Tinter Win.geometry frame ("750x250") #Create a text text box = text (Vitória, width = 50, height = 30, background = "gray 71", foreground = "# fff", font = ("sans serif", 13, 'Italy bold')) #Inter the text at the beginning of Text.Insert (insert, write something about you ") Text.pack (Expand = 1, Fill in = Both) Win.MainLoop () Produce the above code to display the text box in the window. The standard text is initially set to the beginning in the text box. So I used a message = myclass.mymethod () thinking that this would produce "olá world!" "Instead, I get a mistake.
